WORK EXPERIENCE

Front End Developer

W3 Origin | Aug 2021 - Now

PROJECT SUMMERY

Title: DG e-Commerce 3.1

URL: <https://dg-ecom-react.netlify.app>

Overview

- Very beautifully designed a dummy e-Com portal for fetching data from multiple APIs, Category-wise. Complete component based React-App!
- This portal takes Login, for adding the items into Cart & Favorite. And shows those to the user during next login session.
- CRUD operation on API.
- It's a Responsive website.

Role

- Developed and designed by the Self.

Technology

- ReactJS, Redux, Axios, Firebase-authentication, React-Hooks, JSX, CSS

Title: WEATHER 4.3 (Weather + Login)

URL: <https://weather-43-login.netlify.app>

Overview

- A Web-portal to show Current Weather records of cities (around 200,000) across the globe on entering the City Name!
- This portal stores the User's Login record along with the city names entered during its login sessions!
- On next Login, it first (automatically) shows the Weather records of previous entered cities. Then shows the record of subsequent city entered and also saves it.
- Record (of city weather) can also be deleted.
- It's a Responsive website.

Role

- Developed and designed by the Self.

Technology

- ReactJS, Axios, Firebase-authentication, React-Hooks, CRUD operation on API, JSX, CSS

PROJECT SUMMERY

Title: WEATHER 3.0 (Current + AQI + Forecast)

URL: <https://dg-weather-3.netlify.app/>

Overview

- An enhanced Web-portal for providing user with Current Weather records of cities across the globe (around 200,000) along with Current Air Quality Index and 5 days' Forecast on entering the City Name! This site is using 3 API-links !
- It's a Responsive website.

Role

- Developed and designed by the Self.

Technology

- JavaScript, JSON (fetch), jQuery, CSS, HTML

Title: DG e-Commerce 1.6

URL: <https://dg-ecom.netlify.app/>

Overview

- Very beautiful slick design of a dummy e-Com portal for fetching data from multiple APIs, Category-wise.
- This is a multi-page portal. Using 5 APIs in it.
- It's a Responsive website.

Role

- Developed and designed by the Self.

Technology

- JavaScript, JSON (fetch), jQuery, CSS, HTML

Title: Floor & Decor

Overview

- A website designed for offering Interior-design services and Products for the same! The website is for providing information & showing all services offered.

Role

- Assisted in implementation of web designing ideas to increase user-interface and end-user's experience.

Technology

- JavaScript, Bootstrap, jQuery, CSS, HTML

Title: Cambay Consulting

Overview

- A web-portal for offering consultancy services, and other businesses.

Role

- Assisted in implementation of web designing ideas to increase user-interface and end-user's experience.

Technology

- JavaScript, Bootstrap, SASS, jQuery, CSS, HTML
